

# Wheelchair spaces in Saffron Hall

Example view from Row Z

Example view from Row D

## Row Z

Wheelchair spaces and companion seat pairs:  
Z3-4 & Z23-24

This 'row' is made up of free standing chairs which can be moved around to accommodate the width and depth of your wheelchair. All the chairs and spaces in this row have step-free access and are close to the doors, so you can leave the Hall during the performance quickly from this position without creating a disturbance if you need to. These seats are under a slight balcony overhang, so the general quality of the sound is a little worse in these seats than in most other seats in the Hall.

## Row D

Wheelchair spaces and companion seat pairs:  
D2-3, D5-6, D17-18 & D20-21

The width of these wheelchair spaces is approx 1m, and the distance between the backboard of the row and the railing of the row in front is 1.5m, which needs to accommodate a gangway for people to pass in front of the wheelchair as well as the depth of the wheelchair itself.

We recommend that wheelchair users with particularly large wheelchairs, wheelchairs with elevated leg supports or wheelchairs with large turning circles, use row Z where possible to avoid obstructing this gangway.
